Error opening Element Parameterizer tool (AGWA2 for ArcGIS 9.3.1)
Posted by SamLamont - 2009/10/14 20:54

_____

Hello,

I get the following error message when trying to open the "Element Parameterizer" tool (before the form opens):

FormParameterizerElements.New()
      Exception from HRESULT:0x80040258

Any ideas on why this is happening? I have successfully discretized the watershed for KINEROS (I think anyway!).

Thanks,

Sam
